## Tech Rider

Hi,

And thank you for working with us. We're a bunch of livecoders with minimal tech requirements, but having these requirements in place allows us to offer a smooth production with focus on our output rather than the hassles of tech setup.

### Sound

#### Mixer

We will be playing one after another. To ensure smooth transitions between sets, we require a mixer on stage with at least Two Stereo input channels with 6.35mm Jack inlets. DJ mixers typically do not have Jack Inputs but RCA plugs, this is not OK, we need 6.35mm Jack inputs. The stereo pair that comes from our sound cards look like the one on the right. Make sure this fits the mixer. Two Stereo pairs.

#### Monitor

Please provide adequate stereo stage monitors with volume and balance controls on the mixer

### Video

#### HDMI

Livecoding cannot be done without visuals. We output our image via standard HDMI. Please provide a tested cable (long cables tend to be very bad and sometimes work and sometimes don't). If a video mixer is used, put it on stage next to the audio mixer so we can control

it ourselves and in that case 2 HDMI cables and a stage monitor for image as well.

Projector should be HD (1920x1080 at least for legibility of the code) and powerful enough to provide a bright image. The more Lumen the better

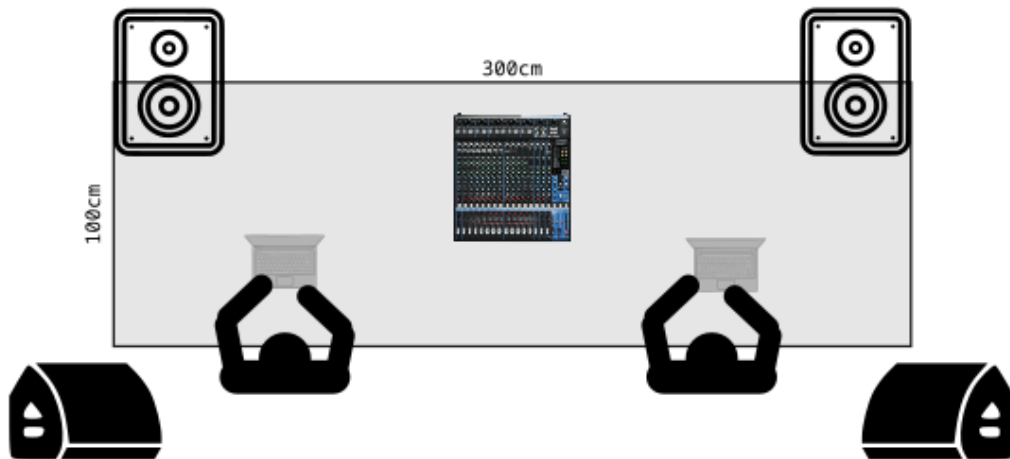

## Stage

Stagedesk should be standing height, room for two coders at once.

About 1m by 3m is recommended.

Projection should be behind the coders, extra screens are encouraged. If the projectors beam on the coders this is no problem at all.

Monitors can be on desk or on the floor.

# Hospitality Rider

## Arrival

Please provide instructions for loading/unloading and a place to park the car. We arrive all at our own pace, but some will want to do some line tests before the show. Some setups require extra instruments, we need a safe space to store these before/after the show.

## Backstage

A place where we can cooldown/prepare that is a bit relaxed and cozy. We share this space with all the coders. A fridge with some drinks, alcoholic and non-alcoholic. Some snacks, fruits, nuts, candy...

## Food

About food. Some of us come from the other side of Belgium, they traveled and will be hungry. A relaxed meal together before the show allows us to prepare and do some final arrangements. Please provide a decent meal. The how and what is very open and we love pleasant surprises, but some of us are vegan. Please take this into account.

## Drinks

Please provide adequate drinks both front- and backstage so we don't have to worry about this and we can focus on the music.
